

I want you to reject petition 04-160.
To take the side of the NAB and allow them to restrict their competition rather than improve their own content, is both unjust and and harmful to their own industry. Without competition, the media conglomerate services will continue to decline.

I, and the other subscribers who are willing to pay for access to the content we desire, should not be limited by NAB. After all, if we could get the same service for free, why would we pay for it?

Thank You for your consideration,
Jay Kasell
